Enjoy One of Ontario's Finest Birding Hot Spots

Presqu'ile Provincial Park is considered one of Ontario's best bird viewing locations. The peninsula's marshes, bays, sand dunes, beaches and field and forest communities meet the nesting requirements of 127 different bird species. 329 bird species have been recorded in the park. Presqu'ile is best known for the large numbers and diversity of waterfowl, warblers and shorebirds that migrate through each spring and fall.

We welcome you to explore the great diversity of habitats and bird life Presqu'ile has to offer. Reliable locations to see birds on the peninsula are specified in this pamphlet. While in the park, you can find out what has recently been sighted by checking the Bird Sightings Board. A weekly birding report is also posted on the Friends of Presqu'ile website (www.friendsofpresquile.on.ca).

Presqu'ile's bird checklist is available for sale from the Friends of Presqu'ile Lighthouse Gift Shop or on the Birds of Northumberland County website (http://homepage.mac.com/wings_4d/bonc/bonc_index.html).

If you are new to bird watching, Presqu'ile offers the following special events to introduce visitors to birds in the park: Winter Bird Workshop (January), Waterfowl Festival (March), Warblers & Whimbrels (Victoria Day Weekend) and Monarchs & Migrants Weekend (Labour Day Weekend).

Presqu'ile Provincial Park is located on the north shore of Lake Ontario, five minutes south of the town of Brighton. For more information about Presqu'ile or its programs, contact:
