

## DONAL GRAY, DIRECTOR, TECHNOLOGY

Donal grew up in Loyalist Township just west of Kingston and graduated from St Lawrence College in 1975 as an Electronic Engineering Technologist. He then went on to work in several technical capacities from the Military to Queens University. In 2000 he joined Measurement Canada and became a Senior Inspector for the compliance and enforcement of the Weights and Measures Act.

In 2012, Donal transferred from Measurement Canada's office in Hamilton to the office in

Belleville.

Don and his wife Brenda scrambled with only 5 days to find and buy a house. They spent a full week looking at homes across Belleville, the County, Frankford, Stirling, Trenton and Brighton. The home they purchased was the last home they looked at as they headed back to Niagara.

In 2016, Don retired and as part of his enjoyment of keeping busy, Don volunteered with The Friends of Presqu'île Park on the Plover protection initiative. It was about that time the Communications Director moved away and someone was needed quickly to learn and take over the Website. Don spent time working with The Friends of Presqu'île Park's web hosting service to learn the website. The rest, as they say, is history!
